Education and Qualifications

2019 **Sudan University of Science and Technology** Bachelor of Science Khartoum, Sudan in Civil Engineering

Work Experience

Cost Controller

Project Management Bureau Co. | Khartoum, Sudan | Feb 2022 – Feb 2024

- Participated in strategic negotiations with suppliers to procure necessary goods and tools for project execution
- Conducted regular cost forecasting and variance analysis, providing actionable insights to project managers, resulting in improved decision-making.
- Collaborated with procurement teams to negotiate contracts, resulting in a 15% decrease in material costs.
- Prepared and presented financial reports to stakeholders, enhancing transparency and accountability

Interface Engineer

Project Management Bureau Co. | Khartoum, Sudan | Jan 2021 – Feb 2022

- Served as the primary technical liaison between the project team and the client, Qatar Charity. Facilitated regular meetings to ensure project execution aligned with the client's humanitarian mission, providing progress updates and managing expectations for the multi-service educational and residential complex.
- Managed and resolved technical interfaces between diverse project disciplines, including civil/structural, MEP (Mechanical, Electrical, Plumbing), and architectural teams. Ensured seamless integration of designs for the schools, health center, and residential dormitories to prevent clashes and rework during construction.
- Developed and controlled the project's Interface Management Plan, establishing a formal system to track and resolve all technical queries and information requests between the consultant, contractors, and client, ensuring timely flow of critical data.
- Proactively identified and addressed on-site interface issues between different construction packages and contractors. Coordinated joint site inspections and facilitated the smooth handover of completed facilities (e.g., school buildings, health clinic) to the client, ensuring all systems were integrated and functional as specified

Site Engineer

Project Management Bureau | Khartoum, Sudan | July 2019 – December 2020

- Setting out sites, checking technical designs and drawings for accuracy and to ensure that they are followed correctly, ensuring project packages meet agreed specifications, budgets and/or timescales, liaising with clients, subcontractors, local authority employees, architects and other professionals, especially quantity surveyors and the overall project manager, providing technical advice and solving problems on site, preparing site reports and logging progress.
- Spearheaded new engineers and clerks' recruitment from job posting, interview, salary negotiation till Induction.

Trainee Site Consultant Engineer

AL DAR Engineering Consultants | Khartoum, Sudan | Apr 2017 – July 2017

- Actively monitored daily construction activities for a major tower project, assisting with on-site inspections to ensure all work performed by contractors adhered strictly to approved engineering drawing
- Technical Documentation & Progress Reporting: Maintained comprehensive site records, including daily progress logs, photographic documentation, and material submittal reviews. Contributed to the preparation of detailed weekly and monthly progress reports for senior management and the client.
- On-Site Problem Resolution & Coordination: Supported senior engineers in identifying and resolving on-site technical queries and construction challenges by conducting site measurements, reviewing design documents, and facilitating clear communication between the design office and construction teams.
- Stakeholder Communication & Meeting Facilitation: Attended and documented regular site progress meetings with clients, contractors, and subcontractors. Assisted in tracking action items and ensuring timely follow-up to keep the project on schedule

Civil Engineer Training

DAL for design and constructure | Khartoum, Sudan | Apr 2016 – May 2016

- Under general supervision, performs routine duties.
- Supervising labor.
- Monitoring casting work.
- Overseeing construction work.
- Monitor and report on subcontractor's plant, equipment, and staffing levels.
- Monitor and report on subcontractor's performance according to contract scope.

Skills

- Project Management: Proficient in developing project plans, scheduling, and resource management.
- Quality and Safety: Strong knowledge of quality and safety standards in the construction industry.
- Communication: Excellent communication skills for effective interaction with stakeholders.
- Leadership: Strong leadership and managerial skills.
- Problem Solving: Ability to work under pressure and resolve issues quickly and effectively.
- Team Collaboration: Effective organizational and time management skills with the ability to work within a team.
